Subject: permit to fly drones

The Environment Agency of Iceland has received an application from JVN Photography ehf., dated January 10th 2023, for a permit to fly drones within Fjallabak and Háifoss at Þjórsárdalur.

Fjallabak is protected as a nature reserve, cf. regulation no. 354/1979. Construction work, extraction of minerals, disturbance to geological formations, vegetation and wild animal life in the protected area is prohibited. The use of unmanned aircraft (drones) within the nature reserve from 15th June – 15th September is subject to a permit from the Environment Agency of Iceland.

Hjálparfoss, Gjáin, Háifoss and Granni are protected as natural monument, cf. regulation no. 110/2020. Disturbance to geological formations, vegetation and wild animal life in the protected area is prohibited. Permission must be obtained from the Environment Agency for organized events and projects that pose a risk of disturbance to geological formations, wildlife or guests in the area. Operating an unmanned aircraft/drone within the protected area is subjected to a permit from the Environment Agency of Iceland.

Description of the project:

The applicant requests a permit for 14 people to fly drones in two workshops. There will be 6 participants in each workshop and two guides. Part of the workshop will take place at Háifoss in Þjórsárdalur and in Fjallabak near Frostastaðarvatn, Tungnaá, canyon behind Bláhnúk, Hnausapoll and Ljótípollur. Screenshots of aerial photos where areas the applicant and his clients intend to fly in were received on January 28th 2023. Drones will take off and land near the parking lot or when it is possible to park the car. Flight altitude will be below 120 meters. It is estimated that 4-5 drones will be flying at the same time. Workshop 1 will take place on August 1st-4th 2023 and workshop 2 will take place on August 16th-19th 2023. The schedule of the work shop depends on weather. Workshop participants will only fly for one day at each location.

Impact assessment:

The Environment Agency of Iceland considers the project not likely to have negative impact on conservation value of the sites and nature. The flights might have negative effect on other visitors experience of the site due to number of drones flying at the same time. The

Environment Agency considers that the impact can be reduced if conditions of the permit are followed.

Conclusions and conditions:

The Environment Agency of Iceland hereby grants JVN Photography ehf. permission on its behalf to fly drones within Fjallabak and Háifoss in Þjórsárdal as described above on August 1st – 4th and August 19th 2023 on the following conditions:

- Keep this letter with you on site during the project. The permit conditions should be introduced to the staff of the project before work begins.
- The applicant shall inform rangers in the area about their arrival and departure. This is to be done 24 hours before entering the area and again before leaving it.
- If the project dates or description changes the Environment Agency shall be notified as soon as possible.
- Members of the project should always stay on authorized paths/tracks/roads.
- The crew must follow rules of conduct that apply to the area.
- If any complications occur during the project, please contact the ranger or the Environment Agency of Iceland, tel. +354 591 2000.
- The applicant should be conscious of other guests on the sites and make sure that filming causes as little disturbance as possible to other visitors. If the material is meant for public viewing it must be noted in the video/subtext that permission from the Environment Agency was obtained for the filming/photography.
- All disturbance to animals and wildlife is strictly prohibited.
- Off-road driving in Iceland is strictly prohibited.
- The project's staff is required to prevent all disturbance to the environment and make sure that all litter is removed from the sites.
- An unmanned aircraft should never be flown in close proximity to people. Please take precaution not to disturb people's experience, their safety or personal privacy nor the general peace of the protected areas being filmed.
- According to Icelandic law it is forbidden to fly close to cliffs where birds nest. An unmanned aircraft should never be flown near animals or birds, neither in nesting areas nor during nesting season or any other seasonal time when animals or bird habitats are considered vulnerable.
- Flight time should be kept to a minimum and flight should be avoided during the area's busiest times of the day.
- If the use of unmanned aircraft causes disturbance to wildlife in the area, its use should be ceased at once.
- The conductor of the unmanned aircraft is responsible for the aircraft within the protected area. This includes taking responsibility of any possible risk of harm to people, fauna and nature and leaving no permanent marks on the site in question. Should the aircraft crash, all components from it must be collected and removed from the area.
- For safety reasons, the pilot of an unmanned aerial vehicle must wear marked clothing so that the person can be identified.

If the developer causes damage to nature, according to art. 87 in the Nature Conservation Act no. 60/2013, the Environment Agency of Iceland can, according to the Nature Conservation Act, f.e. order the licensee to fix damage to nature and vegetation and/or stop the project.

The Environment Agency of Iceland can according to art. 89 in the Nature Conservation Act no. 60/2013 change conditions of the permit, add new conditions or withdraw the permit in order to prevent damage to nature if environmental conditions change.

According to art 89. in the Nature Conservation Act no. 60/2013 the Environment Agency can withdraw the permit if conditions of the permit are not complied to.

Unmanned aircraft should take off and land in a safe distance from other visitors according to regulation 990/2017 on unmanned aircrafts.

The usage of a drone shall be according to regulation no. 990/2017 on the operation of remotely piloted aircraft (<https://www.icetra.is/aviation/drones/>).

Please note that according to the regulation all drones used for commercial flight need to be registered at the Icelandic Transport Authority.

Permission fee:

Environment Agency of Iceland charges a fee for processing applications for permits in protected areas based on Article 92 of Act no. 61/2013 on Nature Conservation. The fee for cinematography and/or photography is 52.600 ISK according to art. 24. b. in the agency's tariff no. 535/2015.

Supervision:

The Environment Agency will supervise the project. The supervisor will be a ranger from the Environment Agency.

Sincerely

Daníel Freyr Jónsson
