Subject: Application for filming with a drone within protected areas in Iceland

The Environment Agency of Iceland has received an application from Henning Kröger dated on the 14th of May 2018, for filming at Þingvellir National Park, Gullfoss, Dynjandi, Geysir and Goðafoss. Using a small drone where that is allowed.

Þingvellir National Park is not administrated by the Environmental Agency and therefore the applicant must have another permit for that area.

Goðafoss is not a protected area and is not administrated by the Environment Agency, the applicant must contact the municipality for a permit for filming in that area.

Gullfoss and Dynjandi are protected by act no. 60/2013 on nature conservation. A permit from the Environment Agency of Iceland is needed for filming in these areas if it involves construction work or disturbance to geological formation, vegetation or wild animal life. Geysir is listed on the Nature Conservation Register nr. 737 an.

According to the management and protection plan for Gullfoss, flying an unmanned aircraft/drone within the boundaries of the protected site is subject to a permit from the Environment Agency of Iceland.

Project description:

The team will be filming in Iceland for a travel documentary show from 15th of June until 18th of June 2018.

16th of June – an organized excursion to Þingvellir, Gullfoss and Geysir.

17th of June – Dynjandi waterfall – a local guide will lead them up to the waterfall.

18th of June – organized excursion to Goðafoss.

Each camera crew consists of three people using a handheld camera and a sound recorder.

Impact assessment:

Based on the information from the applicant the Environment Agency of Iceland does not consider the measurements or the cinematograph likely to have negative impact on the areas.

Due to number of visitors on many of the sites applied for, flying a drone can have negative impact on the visitor 's experience.

Conclusions and conditions

The Environment Agency of Iceland has concluded, based on the information given by the applicant, that the project is not subject to a permit from the Environment Agency for **Dynjandi** and **Geysir** since it is not considered that the filming will have negative impact on the sites.

Permission is hereby granted for filming with a drone in Gullfoss protected area on following conditions:

- **Rangers must be notified before flying a drone within the protected areas.**
- Keep this permit with you during your filming in within the protected areas.
- Crew members should always stay on authorized paths/tracks/roads.
- Off-road driving in Iceland is strictly prohibited.
- Fauna, geological formations and landscape should not be disturbed in any way.
- All disturbance to animals and wildlife is strictly prohibited.
- All disturbance to the environment should be minimal.
- The project's staff is required to prevent all disturbance to the environment and make sure that all litter is removed from the sites.
- The crew should be conscious of other guests on the sites and make sure that filming causes as little disturbance as possible to other visitors. During early morning and late afternoon, there are less people visiting the sites.
- If the material filmed during the project is to be published on the internet, it must be specified that a permission for filming with a drone, within the protected areas, was acquired from the Environment Agency of Iceland and certain rules apply to those areas.
- An unmanned aircraft should never be flown near people. Please take precaution not to disturb people's experience, their safety or personal privacy nor the general peace of the protected areas filmed.
- According to Icelandic law it is forbidden to fly close to cliffs where birds nest. An unmanned aircraft should never be flown near animals or birds, neither in nesting areas nor during nesting season or any other seasonal time when animals or bird habitats are considered vulnerable.
- The conductor of the unmanned aircraft is responsible for the aircraft within the protected area. This includes responsibility so that people, fauna and nature is unharmed because of the aircraft's use and that no permanent mark be left on the site in question. Should the aircraft crash, all components from it must be collected and removed from the area.
- Liability for the use of unmanned aircraft/drone goes by Act no. 60/1998.

Please keep the following in mind:

A special permission from the Transport Authority is needed if the unmanned aircraft/drone weighs more than 5 kg. Permission is also required from ICETRA to fly the drone at a height of more than 130 metres (430 feet). Furthermore, a permission is required from an aerodrome operator to fly the aircraft/drone within 2 km from the boundary of aerodromes with scheduled air services, except where the drones are flown below the height of the highest structures in the immediate vicinity of the flight trajectory of the drone.

Permission from the municipalities or/and the landowners is required for filming with a drone in other areas.

Permission fee:

The Environment Agency of Iceland notes that the agency charges a fee for processing applications for permits for cinematography in protected areas based on Article 92 of Act no. 61/2013 on Nature Conservation. The fee is according to the agency's tariff no. 535/2015, 52.600 is kr.

Supervision:

The Environment Agency will supervise the project on Gullfoss. The supervisor will be a ranger from the Environment Agency.

Sincerely

Sigrún Ágústdóttir
